

OKIYO® APPAREL

2026 | 2027

Designed with the future of our planet in mind.

Discover the Okiyo apparel collection and experience stylish, sustainable clothing that looks good and feels great. This collection is committed to making a positive impact on the environment and is made from organic cotton or recycled materials.

Why Organic Cotton?

Organic cotton is naturally cultivated without the use of any synthetic agricultural chemicals, fertilisers, pesticides or transgenic technology. It was first planted in the 1980's in an attempt to secure sustainable, ecological and biodynamic agriculture. Organic cotton is one of the most environmentally friendly material options, as the production process uses less energy, releases fewer greenhouse gases and due to the improved soil quality, uses significantly less water.

Why Recycled?

Made with environmental mindfulness, our Okiyo collection utilises recycled or sustainable materials. These garments are another step in our journey towards reducing our footprint and impact on the environment.

This **ORGANIC T-SHIRT** is made from soft, breathable **COTTON** and produced using environmentally-friendly methods. By choosing this T-Shirt, you can feel good knowing that you are supporting **SUSTAINABLE FASHION** and making a positive difference in the world

Due to the use of organic materials, slight colour differences may occur from one batch to another. These variations are a natural characteristic of these materials and may be more visible than in garments made from new fibres.
